WORK EXPERIENCE

UI/UX Designer Inficare	Apr. 2023 – Feb. 2024 Kathmandu, Nepal
- Inficare provides enterprise remittance, eKYC, AML compliance, digital wallet, and payment infrastructure for regulated financial institutions. - Owned end-to-end product design for fintech remittance and payments mobile applications at an enterprise financial infrastructure company, delivering 50+ screens across onboarding, eKYC, AML, wallet, authentication, and transaction flows for markets including Thailand, Singapore, and Japan. - Partnered closely with product managers and engineers to translate business, compliance, and technical requirements into user flows, wireframes, prototypes, and developer-ready Figma handoffs; supported implementation by clarifying edge cases, aligning designs with build requirements, and improving delivery across cross-functional teams. - Built and maintained reusable design systems, and branding-aligned UI assets in Figma to improve front-end consistency, reduce duplicate design work, and support more efficient development of regulated financial products.	

Web Developer Webifi	Jun. 2021 – Dec. 2022 Remote
- Webifi is a digital marketing and web design agency based in Ealing, London. - Designed and developed responsive WordPress websites for a diverse portfolio of UK-based businesses, including restaurants, retail shops, fitness brands, wellness providers, and medical practices. - Applied core design principles such as color, typography, spacing, and brand consistency to produce modern digital experiences tailored to each client's industry and audience. - Improved website performance, accessibility, and SEO by following responsive design and front-end optimization best practices.	

Software Engineer Softnep	Aug. 2018 – Mar. 2021 Kathmandu, Nepal
- Softnep is a leading digital solutions company providing website design, software development, mobile app development, digital marketing, web development, and server hosting services for over 20 years. - Contributed to the end-to-end development and delivery of 100+ web projects for leading media houses, including CMS integrations, custom web applications, and new CMS version development using Laravel, Vue.js, and MySQL. - Managed the full project lifecycle from client discussions and requirement gathering through database design, development, testing, deployment, and post-launch support, ensuring solutions aligned with business needs and user expectations. - Progressed from intern to junior and then mid-level engineer by consistently delivering reliable solutions, troubleshooting production issues, collaborating with testers to resolve bugs, and maintaining applications through cPanel and Git-based workflows.	

EDUCATION

Masters of Data Analytics (Major in Software Engineering) Melbourne Institute of Technology	Oct. 2025 Melbourne, VIC
Bachelor of Science in Computer Science and Information Technology Aberdeen International College	Jun. 2019 Kathmandu, Nepal
